Overview

Support firmware development and testing for SSD products at a global technology leader focused on innovation and diversity.

Your Role

Here's what you will be doing:

- Support implementation of firmware development workflows and release lifecycle management processes
- Develop test cases and update tools for product development
- Triage and root cause system, driver, and device interoperability issues
- Develop and debug firmware and software for SSD products
- Debug, optimize, and validate/test SSD firmware on embedded multi-core architectures
- Complete other responsibilities as assigned

About You

What you'll need:

- Pursuing a BS or MS in Computer Science, Computer Engineering, or software-focused Electrical Engineering
- Familiarity with firmware development concepts and embedded systems
- Excellent communication and teamwork skills
- Knowledge of C/C++ development for embedded systems, including storage devices and other embedded platforms is desirable
- Knowledge or experience with ARM or equivalent embedded multi-core microprocessor architectures and experience with JTAG/ICE debuggers and protocol analyzers is desirable
- Scripting experience in Python, Perl, or JavaScript is desirable
- Inclusive, adaptable, collaborative, innovative, and an avid learner

Compensation & Benefits

- Hourly base pay rate: \$28 - \$62 USD

- Relocation support for candidates living 50+ miles from the office
- Housing stipend for summer internship leases
- Charitable giving match and community involvement opportunities
- Emotional wellness support including on-demand apps and paid therapy sessions
- Onsite café and gym, plus virtual fitness classes
- Flexible work environment to support work-life balance
- Comprehensive Medical, Dental, and Vision benefits

Training & Development

Gain first-hand experience in a firmware development team supporting testing of firmware issues and release lifecycle management, with exposure to industry protocols and software development tools.

How to Apply

Applicants are limited to 10 applications across all open jobs within a 6-month period to ensure the best candidate experience.

This job may close before the stated closing date, you are encouraged to apply as soon as possible
